## **DETAILED ACTION**

## Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 13-19, 28-30 and 36 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 13-19 and 36, since both X and Y may be oxygen, the compound is not necessarily a thiocarbonyl.

In claims 28-30, the aster, thiocarbonyl and additive cannot be present at levels of 0%, since the parent claims teach that they are present.

In claim 36, R1 - R7 are not defined.

## Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Application/Control Number: 09/922231 Page 3

Art Unit: 1712

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 1-4, 6-11, 21, 22, 32, 33 and 35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Martin (5394464).

Martin teaches a corrosion inhibitor which comprises a coco-benzo-quat, a phosphate ester and pyridine (see table in column 8). The phosphate ester is within the scope of the present invention (column 4, line 17 - column 5, line 6). Coco-benzo-quat is typically used to denote the coco, benzyl, dimethyl ammonium quaternary compound. Martin differs from the present invention in that the specific use of a halide or sulfate counterion is not disclosed. However, it would be obvious to one of ordinary skill in the art to use quaternary compounds with counterions such as chloride or bromide, which are well known, and usually used in the art.

- 5. Claims 5, 12 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 6. Claims 23-27, 31 and 34 are allowable over the art of record.
